Gamers do not compete versus one another; instead, every player at the virtual table plays individually versus the house (the dealer). If a player's hand is more valuable to 21 than the dealership's hand-- or if the dealership busts (exceeds 21) while the player stays in the video game-- the player wins.

Card Values and Hand Totals

Before mastering the techniques, players must comprehend how cards are valued in a basic video game of live blackjack:

- **Face Cards (Jack, Queen, King):** Worth 10 points each.
- **Aces:** Worth either 1 or 11 points, depending upon which value benefits the hand more.

Understanding Hard vs. Soft Hands

- **Difficult Hand:** A hand that either does not contain an Ace, or includes an Ace valued at 1 (e.g., a hand of 10-6 is a hard 16). Surpassing 21 with a difficult hand leads to an instant bust.
- **Soft Hand:** A hand including an Ace valued at 11 (e.g., an Ace-6 is a soft 17). Soft hands provide flexibility since a player can not bust if they draw a high-value card on the next hit.
