Secret Safety Regulations in the UK

When acquiring children's furnishings in the UK, safety is vital. Bunk beds sold in the UK must follow stringent British and European safety standards to avoid mishaps and structural failures.

1. **British Standard (BS EN 747):** This is the gold requirement for bunk beds and high beds sold in the UK. It dictates extensive screening for structural stability, ladder design, and entrapment dangers.
2. **Guardrails:** Both sides of the top bunk must feature safe guardrails. The range in between the bed mattress base and the top of the guardrail should be at least 160mm to prevent nighttime rolls.
3. **Matress Depth Warnings:** Manufacturers will constantly specify a maximum bed mattress depth for the leading bunk. Disregarding this can minimize the efficient height of the guardrail, posing a safety threat.
4. **Age Recommendations:** UK safety guidelines generally encourage that **children under the age of six need to not sleep on the top bunk** due to the threats related to falls and lack of coordination.

- **Bed mattress Sizing:** UK standard single mattresses determine 90cm x 190cm, but some European imported frames need 90cm x 200cm bed mattress. Constantly confirm the measurements defined by the retailer.
