The core goal is basic: players position bets on the section of the wheel they believe the flapper will land on. Nevertheless, what sets Crazy Time apart from basic wheel video games is the addition of a top slot above the primary wheel and four distinct, highly immersive perk games.

The Four Bonus Rounds: Where the Magic Happens

While banking on numbers supplies stable gameplay, the genuine excitement-- and the video game's huge payout capacity-- lies within the 4 special bonus rounds. If the wheel stops on a bonus segment, players who placed a bet on that specific section get to participate.

1. Coin Flip

The simplest of the benefit rounds, the Coin Flip occurs on a physical digital screen. A coin with a red side and a blue side is turned by a robotic arm.

- Before the flip, random multipliers are designated to both the red and blue sides.

- Whichever side lands face up wins the multiplier for the taking part players.
- If the multipliers are low, a "Rescue Flip" can in some cases be set off, offering players a 2nd opportunity at greater rewards.

2. Money Hunt

Enter a virtual shooting gallery including a massive screen filled with 108 random multipliers.

- These multipliers are concealed behind numerous signs (like a cactus, a target, or a sheriff's badge).
- Gamers are provided a limited time to aim and fire a cannon at their selected symbol.
- When time expires, the covert multiplier behind the selected sign is exposed and used to the gamer's stake.

3. Pachinko

Inspired by the conventional Japanese arcade game, the Pachinko bonus offer round includes a large vertical wall filled with physical pegs.

- The host drops a puck from the top of the board.
- As the puck bounces down through the labyrinth of pegs, it eventually lands in one of the landing zones at the bottom.
- Each zone consists of a multiplier. If the puck arrive on a "DOUBLE" zone, all multipliers on the board double, and the puck is dropped again for even larger wins.

4. Crazy Time

The crown jewel of the game is the Crazy Time benefit round. The host opens a red door, leading gamers into a surreal, vibrantly colored virtual world behind the wall.

- Players are confronted with a colossal virtual wheel featuring three flappers (Green, Blue, and Yellow).
- Gamers pick their preferred flapper before the wheel is spun.
- The wheel consists of massive multipliers, "DOUBLE," and "TRIPLE" segments. If a flapper points to a double or triple worth, all the multipliers on the wheel boost, and the wheel spins again approximately a maximum cap of 20,000 x.

The Top Slot Feature

Adding an additional layer of anticipation to every single spin is the **Top Slot**. Found directly above the main video game wheel, this tiny two-reel slot spins simultaneously with every wheel rotation.

- The left reel picks a random bet spot (a number or a benefit video game).
- The best reel chooses a random multiplier.
- If the Top Slot successfully matches the winning section on the primary wheel, the multiplier is used to that spin or triggers an enhanced perk round. This mechanism is what allows players to secure payments of as much as 500,000 x their original bet.
