The goal for the player is basic in theory, yet agonizing in practice: place a stake (using genuine cash, cryptocurrency, or CSGO skins), see the multiplier rise, and struck the "Cash Out" button before the multiplier crashes. If the gamer cashes out in time, they win their stake multiplied by the current number. If the crash takes place before they squander, they lose their stake totally.

2. **The Ascent:** Once the wagering stage closes, the round begins. A graph or an animated things (often a rocket, jet, or terrorist character) removes, and the multiplier ticks up in real-time.
3. **The Crash:** The round ends suddenly when the system activates a crash. This can occur anywhere-- even immediately at 1.00 x (often described as an "instantaneous bust"), or it can soar past 100x, 500x, or greater.
