This guide explores the mechanics, bonus offer games, strategies, and stats that define this contemporary casino work of art.

What is Crazy Time?

Introduced in 2020 by Evolution, Crazy Time is built on the huge success of earlier wheel-based games like *Dream Catcher* and *Monopoly Live*. Hosted by charismatic presenters in a dynamic, circus-themed studio, the video game focuses on a giant, 54-segment mechanical wheel.

The main goal for players is simple: predict which segment the wheel will stop on after the host provides it a spin. Nevertheless, the game goes far beyond basic guessing by integrating a Top Slot multiplier function and 4 immersive perk rounds that can result in payouts of as much as 25,000 x the player's stake.

The Wheel Breakdown

To understand how the video game works, one should initially look at the circulation of sectors on the primary cash wheel. There are 54 sectors in overall, divided among numbers and bonus games.

Sector Type Variety of Segments on Wheel Payout/ Function **1** 21 Pays 1:1 **2** 13 Pays 2:1 **5** 7 Pays 5:1 **10** 4 Pays 10:1 **Coin Flip** 4 Sets Off the Coin Flip bonus offer round **Money Hunt** 2 Triggers the Cash Hunt perk round **Pachinko** 2 Sets off the Pachinko perk round **Crazy Time** 1 Triggers the supreme Crazy Time benefit round

The Top Slot: Doubling Down on Excitement

Before each and every single spin of the primary wheel, a two-reel **Top Slot** spins concurrently above the main video game. One reel arbitrarily selects a bet spot (a number or a bonus offer game), while the other reel selects a random multiplier (varying from 2x approximately 50x).

If the bet spot and the multiplier align horizontally on the Top Slot, that multiplier is applied to the corresponding section for that spin. If the primary wheel lands on that segment, all wins for that number or bonus offer video game are increased accordingly. This function is the main engine behind the game's most jaw-dropping payments.

The Four Crazy Time Bonus Rounds

The real magic-- and the greatest win capacity-- of Crazy Time lies within its 4 benefit games. When the wheel stops on a perk section, gamers who placed a bet on that section are carried into a secondary video game mode.

Once the timer expires, all targets are exposed, and gamers receive the multiplier hidden behind their chosen target.

3. Pachinko

- **Frequency:** 2 segments on the wheel
- **How it works:** Inspired by the traditional Japanese arcade game, Pachinko includes a large wall filled with physical pegs. The host drops a puck from the top, and it bounces randomly down the board until it lands in among a number of multiplier zones at the bottom.
- **Special function:** If the puck lands in a "DOUBLE" zone, all multipliers at the bottom of the wall double, and the host drops the puck again, permitting intensifying multipliers.
