What Is the Mines Game?

Mines is a *instant-win* casino game where the player is provided with a grid (usually 5×5 or 5×6). Covert underneath some of the squares are "mines." The goal is to expose safe squares without striking a mine. Each safe square you reveal increases a multiplier that uses to your initial stake. At any point you may *cash out* and gather the present multiplier. If a mine is exposed, the round ends and the stake is lost.

The game is deterministic in the sense that the number of mines is fixed before the round starts (typically 1 to 5 mines), and the payment for each safe expose is mathematically linked to that number. Because the outcome is based upon a random number generator (RNG), the outcome is fair provided the operator uses a certified RNG.

How to Play-- Step-by-Step

1. **Select a Stake**-- Select the quantity you want to wager. Most platforms enable bets varying from a couple of cents approximately numerous hundred dollars, depending upon the operator's limits.
2. **Select the Number of Mines**-- Decide the number of mines will be hidden in the grid. The more mines you select, the higher the prospective multiplier, but the danger of hitting a mine grows appropriately.
3. **Expose Squares**-- Click on any square to expose it. A safe square reveals a numerical value that adds to the running multiplier.
4. **Squander or Continue**-- After each expose, you might either cash out and protect the built up multiplier or continue clicking to increase it even more.
5. **Game Over**-- If you uncover a mine, the round ends quickly and the wager is forfeited. If you cash out, the multiplier is applied to your initial stake and the profits are credited to your account.
