In a casino setting, operators have needed to formalize the guidelines to ensure fairness, openness, and a house edge. While standard RPS is player-versus-player (PvP), casino versions generally run as **player-versus-house (PvH)** or use a peer-to-peer competition structure hosted by the platform.

Basic Casino RPS Rules

1. **The Hand Signals:** Players choose their weapon (Rock beats Scissors, Scissors beats Paper, Paper beats Rock).
2. **The Countdown:** An integrated timer counts down (typically 3 seconds). In digital casinos, the gamer locks in their choice before the dealer or computer system reveals theirs.
3. **The Payouts:** Unlike basic gambling establishment video games where odds dictate payments, RPS frequently utilizes a multiplier system based on streaks or particular win conditions.

- **Tournament Play:** Multiple gamers buy into a bracket-style tournament hosted by the casino, where the last person standing takes the prize pool.

- **The Tie Penalty:** In numerous casino versions, a tie (e.g., both gamer and dealership toss Rock) results in the gamer losing their bet, or your home taking a commission on pressed hands.
- **Rake in Tournaments:** In peer-to-peer RPS competitions, the gambling establishment takes a little portion (rake) of the total buy-in swimming pool.
- **Side Bets:** Casinos present high-margin side bets, such as betting on *how* you will win (e.g., "Win with Rock in Round 1").
