1. **Reel 1** display screens one of the wagering alternatives (a number or a reward video game).
2. **Reel 2** screens a random multiplier (varying from 2x up to 50x).

If the horizontal line in the Top Slot aligns a bet with a multiplier, that multiplier applies to that specific result for the upcoming spin. If the primary wheel lands on that outcome, any wins for that round are enhanced by the multiplier. If a reward round is triggered with a Top Slot multiplier connected, the beginning multipliers inside the reward game are immediately increased by that figure.

Diving Into the Four Bonus Rounds

The true heart of Crazy Time depends on its four bonus games. Setting off among these rounds transfers gamers from the primary studio into a distinct augmented reality mini-game.

1. Coin Flip

The simplest of the benefit rounds. A coin with a red side and a blue side is turned by a mechanical arm.

- Before the flip, random multipliers are assigned to both the red and blue sides.
- Whichever side lands face up wins the multiplier for the getting involved players.
- If the multipliers are low, a "Rescue Flip" can often be set off, giving players another possibility at higher rewards.

2. Cash Hunt

- When time ends, all symbols reveal their covert multipliers, and the player receives the multiplier behind their chosen target. Every gamer gets to choose their own spot, indicating various gamers can win various quantities.

3. Pachinko

Influenced by the standard Japanese arcade video game, Pachinko features a glowing, vertical board filled with physical pegs.

- The host drops a puck from the top of the board.
- The puck bounces randomly down through the pegs until it lands in one of the multiplier zones at the bottom.
- If the puck arrive at a "**Double**" worth, all multipliers at the bottom of the board double, and the puck is dropped once again, leading to possibly enormous payments.

4. Crazy Time

The supreme reward round takes gamers behind a red door into a surreal, whimsical virtual world featuring an enormous, 64-segment wheel.

- Gamers should pick one of 3 flappers: **Green, Blue, or Yellow**.

- Whichever sector the selected flapper indicate when the wheel stops is the reward awarded.
- The wheel consists of **"Double"** and **"Triple"** segments. If a flapper lands on among these, all multipliers on the wheel double or triple, and the wheel is spun again. This is where the video game's legendary 20,000 x max multiplier can be attained.
