At its core, Towers is an instant-win multiplier game. Inspired by timeless puzzle mechanics and the classic "minesweeper" genre, the game drops players at the base of a multi-tiered tower. The goal is easy: select a tile on the existing level, hope it exposes a safe course (such as a crown, a star, or a clear action), and advance to the next level.

Each effective action increases the player's potential payout. Nevertheless, with every tier climbed, the risk increases. Covert below one or more of the tiles on each row is a trap (like a bomb or a skull). If a player chooses a trap, the round ends instantly, and their wager is lost.

The appeal lies in player company. Unlike slot makers where the result is entirely passive once the spin button is pressed, Towers allows players to determine when to squander.
