As you click tiles, you either reveal a gem, which increases your payout multiplier, or a mine, which results in an immediate loss of your stake. The goal is to "cash out" with your increased profits before striking a mine.

5	1.27 x	2.10 x	5.80 x

2. The High-Risk "Sniper" Strategy

This includes setting the mine count to a high level (e.g., 15-20 mines) and intending for just one or 2 successful clicks. The multipliers here can be rapid, however the danger of losing the whole stake in a single click is very high.

3. The Martingale Variation

Some gamers try to utilize a modified Martingale method, where they double their bet after every loss. **Care:** This is extremely harmful in Mines because one bad streak can deplete a bankroll in seconds. It is generally encouraged to avoid this unless you are extremely experienced with bankroll management.
