What is the Aviator Game?

At its core, Aviator is a social multiplayer crash game. The premise is brilliantly easy: an aircraft takes off, and as it climbs up, a multiplier coefficient increases. Players put a couple of bets before the round starts and need to hit the "Cash Out" button before the plane randomly flies away.

If a gamer cashes out successfully, their stake is multiplied by the present coefficient. Nevertheless, if the aircraft flies away (crashes) before they cash out, the bet is lost.

Popular Strategies Used by Players

- **The Conservative Approach (Low Multiplier Strategy):** Players concentrate on cashing out early, normally in between **1.20 x and 1.50 x**. While the private payments are small, this method yields a high win frequency and lessens disastrous losses.
- **The Dual-Bet Strategy:** Using the two wagering panels, a gamer might position a bigger bet with an Auto Cash Out set to a low multiplier (e.g., 1.5 x) to protect a stable return, while putting a smaller bet targeted at a much greater, riskier multiplier (e.g., 10x or greater).
- **The High-Risk Approach:** Aiming specifically for high multipliers (50x, 100x, or more). This strategy requires patience, a significant bankroll, and the determination to accept frequent losses while awaiting a huge payment.

Keep in mind: No method can overcome the house edge intrinsic in casino video games. Gamers should always bet properly and view Aviator as a kind of home entertainment instead of a dependable source of earnings.
