

Hunting property management in central Virginia is as much about land stewardship as it is about pursuing game, and one of the most impactful improvements a landowner can make to their hunting property is a well-planned network of shooting lanes. South Atlantic Land Works has been creating shooting lanes and hunting corridors for Virginia landowners since 2017, using forestry mulching equipment to clear precise lanes through timber without the disturbance of conventional clearing methods. A shooting lane cut by South Atlantic Land Works begins with the landowner identifying the sight lines, stand locations, and travel corridors they want to exploit. Mike Mayo and his team then use the forestry mulching machine to clear vegetation to the exact width and length specified, leaving clear lines of sight while preserving the adjacent timber that provides cover for deer, turkey, and other game. The mulch left behind by the process does not create the bare soil disturbance that attracts deer avoidance - the lane looks natural within a short time. The hunting property services offered by South Atlantic Land Works extend beyond shooting lanes. ATV and access trails provide routes to stands and through the property. Food plot site preparation clears and prepares ground for planting. Brush hogging keeps open areas maintained between growing seasons. The combination of these services allows central Virginia hunting property owners to develop their land systematically with a single experienced contractor handling the full scope of work.

South Atlantic Land Works | 1416 Poorhouse Rd, Rice, Virginia 23966 | 434-603-1964

FAQ About

Land Clearing Near Me How much does land clearing cost in Central Virginia? Land clearing costs depend on how thick the vegetation is, the size of the trees, the terrain and how much of the property you want opened up. A lot of light brush and saplings costs far less than mature hardwood on a slope. South Atlantic Land Works gives free estimates after walking the property, so you get a real number for your land rather than a guess. Call 434-603-1964 to arrange one. What is forestry mulching? Forestry mulching is a clearing method where a mulching head cuts and grinds brush, saplings and small trees in place, leaving the material as a layer of mulch on the ground. South Atlantic Land Works runs a mulching head on a CAT compact track loader, so a site in Rice or Farmville can be cleared in a single pass with no hauling and no burn piles. Is forestry mulching better than bulldozer clearing? For most homesites, pastures, trails, fence lines and hunting land, mulching is cleaner and more cost effective because it keeps topsoil and roots in place and eliminates burn piles. A dozer can remove stumps and strip a site completely, which some building projects need. Mike at South Atlantic Land Works will recommend the right mix for your property, including grading or stump grinding where needed. Can I clear land during Virginia's spring burning season? Yes, if the clearing is done by mulching. Virginia's 4 PM Burning Law restricts open burning near woodland from February 15 through April 30, which can hold up traditional clearing that relies on burn piles. Because South Atlantic Land Works grinds vegetation in place, there is nothing to burn and spring projects can go ahead on schedule. Do I need a permit to clear land in Virginia? It depends on the size and purpose of the project and on your county's rules. Larger land disturbing projects can fall under Virginia's erosion and sediment control requirements, so it is worth checking with your county before work starts. Mulching leaves soil covered and roots in place, which helps limit erosion. South Atlantic Land Works can talk through your plans when it walks the property. How long does it take to clear an acre of land? Clearing time varies with vegetation density, tree size, slope and ground conditions. Light brush can go quickly, while heavy timber or steep ground takes longer. After walking your property, Mike at South Atlantic Land Works can give you a realistic timeframe along with your free estimate, and the crew works Monday through Saturday to fit your schedule. What happens to the trees and brush after clearing? With forestry mulching, trees and brush are ground into wood chips and spread across the cleared area. That mulch layer protects Piedmont clay from erosion, holds moisture and breaks down into organic matter over time. There are no debris piles to haul away or burn, which is one reason South Atlantic Land Works uses mulching on most jobs. Can you save certain trees when clearing my property? Yes. Selective clearing is one

of South Atlantic Land Works' specialties. Before work begins, Mike walks the property with you and marks the oaks, shade trees and privacy screens you want to keep. The compact track loader and mulching head can then clear the underbrush and unwanted trees around them without damaging what stays. Can you clear land for food plots and hunting? South Atlantic Land Works regularly clears food plots, shooting lanes and access trails on hunting land across Prince Edward, Cumberland, Buckingham and Charlotte counties. Mulching opens the ground for discing and seeding while leaving the surrounding cover that holds deer and turkey intact. Will the brush grow back after forestry mulching? Some species, such as sweetgum and many invasive shrubs, can sprout back from roots, so mulching works best with follow up mowing or maintenance. Once the woody growth has been cleared, keeping it open is usually straightforward. Mike at South Atlantic Land Works can suggest a maintenance plan based on what is growing on your land. What areas does South Atlantic Land Works serve? South Atlantic Land Works is based at 1416 Poorhouse Rd in Rice and serves Central and Southside Virginia, including Farmville, Hampden-Sydney, Prospect, Pamplin, Burkeville, Crewe, Blackstone, Cumberland, Dillwyn, Keysville, Charlotte Court House, Drakes Branch, Amelia Court House, Kenbridge and Victoria. Call 434-603-1964 to check whether your property is in the service area. Do you offer grading after land clearing? Yes. South Atlantic Land Works can grade house pads, driveways, building sites and fields after clearing, so you can take a property from overgrown to ready with one contractor. Getting drainage right on red clay soil is important, and the crew shapes the ground so water moves away from where it should not sit.
