What is Crazy Time?

At its core, **Crazy Time** is a live dealer video game built around an enormous, vertically mounted 56-segment money wheel. Hosted by charming presenters in a lively, Willy Wonka-esque studio, the game is transmitted in real-time with high-definition video and immersive audio.

Unlike standard casino games determined strictly by computer algorithms, Crazy Time depends on a human host to spin the wheel and communicate with the audience through live chat. The main objective is simple: players put bets on which section the wheel will stop on. However, the addition of a Top Slot multiplier above the wheel on every spin keeps the gameplay vibrant and unpredictable.

Coin Flip

This is the easiest and most regular bonus offer round. The host steps up to a device that flips a coin with a **Red** side and a **Blue** side.

- Before the flip, random multipliers are designated to each side of the coin.
- Whichever color lands face up figures out the winning multiplier for all gamers who bank on Coin Flip.

Money Hunt

Cash Hunt takes players to an enormous digital screen including a shooting gallery filled with 108 random multipliers.

- Each multiplier is hidden behind a different symbol (such as a cactus, target, or chef's hat).
- Players are given a limited time to goal and fire a cannon at a symbol of their option.
- When time expires, the concealed multipliers are revealed, and each gamer receives the multiplier behind their chosen target.

Pachinko

Influenced by the traditional Japanese arcade video game, Pachinko features a large physical board filled with pegs.

- The host drops a radiant puck from the top of the board.
- The puck bounces arbitrarily down through the pegs till it lands in one of several multiplier slots at the bottom.
- If the puck arrive on a "**Double**" value, all multipliers at the bottom of the board double, and the host drops the puck once again for even bigger wins.

Crazy Time

The holy grail of the game, the **Crazy Time** bonus offer round, leads gamers behind a red door into a vibrant, surreal virtual world featuring a massive 64-segment wheel.

- Players should pick among 3 flappers: **Green, Blue, or Yellow**.
- The host presses a huge red button to spin the wheel.
- Whichever section the picked flapper indicate is the multiplier the player wins.

- Simply like Pachinko, this wheel consists of "**Double**" and "**Triple**" sectors, which can send multipliers increasing approximately the video game's optimum limitation of 20,000 x or 25,000 x.
