What is Crazy Time?

At its core, Crazy Time is a live online video game show built around a giant, vertically installed monetary wheel. A charming, live human host spins the wheel while engaging with gamers through a live chatroom. The primary objective is easy: players place wagers on where they believe the wheel will stop.

Nevertheless, the video game is much more intricate than a standard carnival wheel. It incorporates state-of-the-art video production, slots mechanics, and immersive benefit games that carry gamers into virtual worlds.

The Game Wheel Breakdown

The Crazy Time wheel includes 54 sections. Each segment represents either a number (1, 2, 5, or 10) or among 4 perk games. The frequency of each outcome on the wheel dictates its payout capacity and likelihood of landing.

Wheel Segment Payout/ Type Number of Segments on Wheel Likelihood (%) **1** 1 to 1 21 38.89% **2** 2 to 1 13 24.07% **5** 5 to 1 7 12.96% **10** 10 to 1 4 7.41% **Coin Flip** Perk Round 4 7.41% **Cash Hunt** Perk Round 2 3.70% **Pachinko** Benefit Round 2 3.70% **Crazy Time** Perk Round 1 1.85%

As shown in the table, basic numbers appear most regularly, offering lower payouts, while the coveted reward rounds appear much less frequently but hold the capacity for huge multipliers.

The Top Slot: Adding Extra Spice

Before every single spin of the primary wheel, a two-reel slots placed straight above the wheel spins at the same time.

- **Reel 1** display screens one of the wheel's betting segments (numbers or bonus offer games).
- **Reel 2** screens a multiplier (ranging from 2x as much as 50x).

If the sign on Reel 1 matches the result of the main wheel spin, the multiplier on Reel 2 is used to that win. If a bonus video game is picked by both the Top Slot and the primary wheel, the base multipliers inside the benefit

round are quickly increased, setting the stage for possibly huge payouts.

The true heart and soul of Crazy Time are its 4 reward rounds. When the wheel stops on a perk sector, gamers who placed a wager on that segment are transported into a secondary video game.

1. Coin Flip

- **Frequency:** 4 sectors on the wheel
- **How it works:** A basic yet awesome video game of possibility. A coin with a red side and a blue side is turned immediately by a maker. Before the flip, two random multipliers are appointed-- one to the red side and one to the blue side. Whichever side lands face up wins the assigned multiplier for the player.

2. Money Hunt

- **Frequency:** 2 sectors on the wheel
- **How it works:** Players deal with a huge virtual screen including a grid of 108 random multipliers. These multipliers are then covered by different symbols and mixed. Gamers have a restricted time to objective and "shoot" at a symbol on the screen to reveal their concealed multiplier. Each player can pick a various sign, leading to diverse results.

3. Pachinko

- **Frequency:** 2 sectors on the wheel
- **How it works:** Inspired by the standard Japanese arcade game, this perk round includes a big Pachinko wall filled with physical pegs. The host drops a puck from the top of the wall, and it bounces randomly down through the pegs till it lands in among several multiplier zones at the bottom. If the puck lands in a "DOUBLE" zone, all multipliers at the bottom double, and the puck is dropped once again.

4. Crazy Time

- **Frequency:** 1 segment on the wheel
- **How it works:** The supreme benefit round. The host opens a red door, stepping behind it into a colossal, vibrantly colored virtual world including a huge, 64-segment wheel.
- Gamers should pick one of three flappers (Green, Blue, or Yellow).
- The wheel is spun, and whatever multiplier the selected flapper points to is awarded.
- Simply like Pachinko, if the wheel lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel boost, and the wheel is spun once again, as much as an optimum incredible multiplier limit of 20,000 x.
