For a lot of contractors and local service businesses, a website redesign sounds good right up until the price comes up. A full rebuild often means a large bill before the site even goes live. That is where a different setup can make more sense.

Scalable Websites is a website design company based in Montgomery, TX, serving contractors, home service businesses, and local small businesses across Montgomery County and greater Houston. Instead of pushing a big upfront redesign cost, the company offers monthly plans with a 6 month minimum, then month to month after that. That gives business owners a way to get a professional website redesign in place without having to carry the full cost all at once.

This matters for companies that need a stronger online presence but still have trucks to run, payroll to meet, and materials to buy. Whether you are looking for contractor website design or small business website design, the goal is simple, build a site that helps you get calls and leads, without making the first payment feel like a punch in the gut.

A website redesign built for real service businesses

A website redesign is not just about changing colors or swapping out a few photos. For a contractor or home service company, the site needs to do practical work. It needs to look good on a phone, make it easy for people to call, and give potential customers a clear way to reach out.

Scalable Websites builds and manages mobile-first websites for trades like roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and more. The team brings 10+ years of experience and 200+ websites built for home service businesses.

Every site includes the basics that matter for lead generation and day-to-day use. That includes click-to-call, web design the woodlands scalablewebsites.com Google reviews shown on the site, custom lead forms with instant text and email alerts, on-page SEO from day one, and hosting and security included with the plan.

For businesses searching for a website designer Montgomery TX companies can actually meet with, that local service model can be helpful. Scalable Websites meets clients in person across Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land.

How the monthly model lowers the upfront burden

The main reason the monthly setup works is simple. It spreads the cost of web design Montgomery TX businesses need into manageable payments instead of requiring one large investment at the start.

There are three plan options:

- Starter, $95 a month for a single-page site
- Growth, $195 a month for 3 to 5 pages, plus missed-call text-back, unlimited lead follow-up, Search Console and Google Analytics
- AI Enhanced, $295 a month for 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations

All plans come with a 6 month minimum. After that, they move to month to month. There is also a 30-day money-back guarantee on signup.

That structure gives a business owner room to move forward on a website redesign without waiting until there is extra cash sitting around. It can also be easier to budget for website maintenance when it is already part of the plan instead of becoming a separate surprise later.

Another practical point is ownership. The client owns the site after 36 months. There is also a free design refresh every 36 months, which helps keep the website from getting stale as the business grows.

Why ongoing website maintenance matters after the redesign

A lot of business owners have had the same experience. The website gets built, then nobody touches it. A phone number changes, services get updated, a new review web design montgomery tx comes in, or something technical needs attention. Before long, the site starts falling behind the business.

That is why website maintenance matters just as much as the redesign itself. Scalable Websites includes unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. That means the site is not left alone once it launches.

For home service businesses, this kind of support is practical. If you need to update service areas, add a new offer, change photos, or adjust page content, those requests are part of the ongoing service. The business owner does not have to track down a different vendor every time something small comes up.

For companies looking at web design The Woodlands or surrounding areas, this can be the difference between having a website that just exists and having one that is actually maintained.

A local option for contractors who want straightforward website help

Some business owners want to deal with a company that understands service-area businesses and can meet in person. That is part of what sets Scalable Websites apart. It is veteran-owned, founded in January 2025, and focused on businesses that need practical website help, not a complicated pitch.

The company is open Monday to Friday, 8 AM to 5 PM, and has a 5.0 star Google rating. Owner Preston Toor and the team work with businesses across Montgomery County and greater Houston, including contractors who need custom web design, custom WordPress websites, website redesign, and website maintenance.

If you are a contractor or local small business owner, the value in this model is straightforward. You get a mobile-first website, lead-focused features, and ongoing support, without the large upfront cost that often comes with a redesign. That can make it easier to improve your online presence now, instead of putting it off for another busy season.
