3. **The Reveal:** The player clicks tiles. If a "gem" or "coin" is revealed, the multiplier boosts.
4. **The Blast:** If a mine is uncovered, the round ends quickly, and the wager is lost.
5. **Cash Out:** The gamer can select to "Cash Out" at any point, protecting their current profits based upon the revealed multipliers.

The Mathematics of Risk

The game is built on a Random Number Generator (RNG), making sure that each board is distinct. The multiplier benefit is directly proportional to the likelihood of hitting a mine.

This permits players to click 5 to 10 tiles consecutively, compounding small gains into a significant win. It is ideal for gamers wanting to fulfill wagering requirements for rewards.

2. The "Sniper" Strategy (High Volatility)

This approach includes setting the mine count to a high number (e.g., 10-15) and only clicking one or 2 tiles. Because the payout for discovering a single safe tile on a board packed with mines is high, the player goes for "one-and-done" sessions.

3. The Martingale Variation

Some gamers apply a customized Martingale system. If they lose a round, they double their wager on the subsequent round while keeping the mine count constant.
