Plinko Crypto is a digital variation of the traditional casino and game-show game, adjusted particularly for online gambling establishments that accept cryptocurrencies like Bitcoin (BTC), Ethereum (ETH), Tether (GBPT), and Litecoin (LTC).

At its core, the game is incredibly simple:

1. The player sets their bet amount and drops a ball (or "puck") from the top of a triangular grid filled with pegs.
2. As the ball falls, it bounces randomly off the pegs.
3. It eventually lands in one of the slots at the bottom, each bring a different multiplier worth.
4. The player's payment is computed by increasing their original bet by the multiplier of the slot where the ball lands.

Unlike skill-based games like poker, Plinko is a game of pure opportunity. Nevertheless, the increase of "Provably Fair" innovation in crypto casinos has offered gamers a **bitcoin plinko** level of transparency that standard online gambling just can not match.
