What is the Aviator Casino Game?

At its core, Aviator is a multiplayer social game built around an increasing multiplier curve that can "crash" at any moment. Unlike standard slots where a random number generator (RNG) figures out the result of a fixed spin, Aviator offers gamers a sense of agency.

The premise is stealthily simple:

1. An airplane takes off on the screen.
2. As the airplane climbs up higher, the multiplier connected to the gamer's bet boosts.
3. The objective is to squander before the plane flies away (crashes).
4. If a player cashes out in time, they win their stake increased by the existing coefficient. If the aircraft flies away before they cash out, the bet is lost.

The game's visual is deliberately minimalist, similar to early computer graphics, which ensures it runs efficiently on both home computer and mobile phones without lagging.
