

Build a yard brief around everyday use before choosing individual landscape features. Describe the routes people need, the places you want to spend time and the existing parts of the garden you want considered. This gives a landscape discussion a clear starting point.

Describe the activities that matter

Explain how the space is used now and what you would like to change. Keep essential routes separate from optional features. Photographs and a simple sketch can help show the relationship between entrances, existing planting and the areas under discussion.

Make priorities visible

Identify which changes matter most and which could wait. If you are unsure about a feature, record the question rather than treating it as a fixed requirement. Ask how a proposal responds to those priorities and what information is still needed. Keep the brief with later quotes so you can compare the proposed work with the use you originally described.

R & G Almanza Landscape Inc provides landscaping and landscape design services.

Keep the next decision clear

Check the connections between this question and the rest of the yard brief. A change in one area may prompt [landscape design chicago](#) another discussion, but it should not silently become an instruction to expand the scope.

R & G Almanza Landscape Inc offers mulching.

R & G Almanza Landscape Inc offers seasonal cleanup.

R & G Almanza Landscape Inc is family-owned and has been in business since 1999.

Landscape project planning questions

What belongs in a landscape project brief?

Describe the area, its intended use, what you want to retain and the questions you want assessed.

How should proposals be compared?

Compare the work, preparation, selections and exclusions against the same brief before considering differences between totals.

What should inspiration photographs explain?

Label the particular arrangement or detail you like and discuss how that preference relates to the actual property.

How can unresolved choices be recorded?

Keep an explicit list of questions and identify what information is needed before each selection can be made.

What access questions should be discussed?

Describe entrances, gates and everyday routes, then ask which arrangements are relevant to the proposed work.

How should a staged project be discussed?

Ask what each stage includes, how the areas connect and the condition expected between stages.

How does maintenance fit into a design discussion?

Explain which care tasks you intend to arrange and ask what information accompanies the proposed work.

What should a revised proposal identify?

Record the affected area, the changed selection and which earlier assumptions still apply.

How can a lawn maintenance enquiry be clearer?

Name the lawn area and tasks under discussion, keeping observations separate from assumptions about their cause.

What should be kept at handoff?

Retain the current scope, agreed changes and care information, with outstanding questions identified separately.
