According to the **Nash Equilibrium**, the optimum unexploitable technique in a single-throw [Rock Paper Scissors Gambling Game](#) game of RPS is to choose Rock, Paper, and [Click here to find out more](#) Scissors with equivalent and random frequency (33.3% each). If a player embraces this technique, no opponent can gain a long-term mathematical benefit over them.

Choice Beats Loses To Mathematical Probability (Random) **Rock** Scissors Paper 33.33% **Paper** Rock Scissors 33.33% **Scissors** Paper Rock 33.33%
