

The definition nobody gives you

Most outdoor lighting answers the question of how to light a property. Accent lighting asks which one thing should be looked at. It is selective by definition. One feature, chosen on purpose, while everything around it stays dark. The dark part is not a gap in the plan. It is the other half of the effect. The concept takes one sentence and a lot of discipline. Pick what matters [permanent lighting installation](#) and stop there. The pull is always to light one more thing, and holding it is the entire skill.

What tends to earn it

Not everything is improved by a fixture pointed at it. Anything with texture responds well, because light raking across a rough surface creates shadow and shadow creates interest. Smooth surfaces light up evenly and stay dull. Form is the other thing to look for.

How people get it wrong

The failure mode is always the same: everything becomes an accent. The homeowner likes the first uplit tree and asks for a second, then the whole bed, then the driveway. Once everything is lit, the emphasis is gone, and the plan is just illumination. Restraint is the technique. The best accent plans read as sparse in a drawing and correct once you are standing in front of the house after dark.

How it fits with the rest

Accent lighting rarely stands alone. The other layers are path and bed lighting, security coverage, and the house itself. It is the difference between a lit property and a designed one.

Dimmer than you think

Output is easy to get wrong upward. After dark the threshold is low, and too much reads as a floodlight. You are creating a point of interest, not lighting a work area.

From below or down out of a tree

Direction changes the whole character. Uplighting comes from below, so it reads as dramatic and slightly theatrical. Light from above reads as ordinary, which is why it suits places people sit.

Plants grow. The aim drifts

Anything aimed at a tree or a shrub will be aimed slightly wrong eventually. Growth blocks the throw, and ground level fixtures get knocked out of position. Nothing is broken. It simply needs adjusting. Re aiming every couple of seasons keeps the plan looking the way it was designed to. Aim gets checked the same way the design was made: by standing on the property after dark and looking.

Getting it designed

The choices are property specific, so the plan begins with somebody coming out. What does EverCrest Lighting do?

EverCrest Lighting designs and installs outdoor lighting for homes and businesses. The work covers permanent LED architectural and holiday lighting, roofline lighting, landscape lighting, patio lighting, accent lighting, security lighting and event lighting, along with custom outdoor lighting design.

Where is EverCrest Lighting based?

EverCrest Lighting is based in Greenville, South Carolina. It is a service area business, so it travels to the customer and does not publish a street address.

What areas does EverCrest Lighting serve?

EverCrest Lighting serves Upstate South Carolina and Western North Carolina. That includes Greenville, Spartanburg, Greer, Simpsonville, Mauldin, Taylors, Easley, Travelers Rest, Fountain Inn, Anderson, Clemson and Seneca. If you are unsure whether your address is covered, call (864) 252-1732 and ask.

What is permanent outdoor lighting?

Permanent outdoor lighting is a fixed LED system installed along a building's roofline, eaves and architectural lines and left in place all year. The LEDs sit in a track that is color matched to the trim, and the system is controlled from a smartphone app. It replaces the seasonal strands that go up and come down each year.

Are the lights noticeable during the day?

The track is color matched to the trim or fascia and mounted tight along the edge of the roofline, so it is designed to stay discreet in daylight and read as part of the house rather than as decoration.

Does EverCrest Lighting install Christmas lights?

Yes. EverCrest Lighting installs Christmas and holiday lighting, and also installs permanent LED systems that handle holiday colors from an app. On traditional holiday lighting, EverCrest Lighting handles takedown at the end of the season and off season storage.

Does EverCrest Lighting work with businesses?

Yes. EverCrest Lighting installs commercial outdoor lighting, including storefront and facade lighting, entrances, patios and permanent architectural lighting in a company's own colors.

How do you contact EverCrest Lighting?
