The facility is deceptively simple:

1. A plane removes on the screen.
2. As the airplane climbs up greater, the multiplier connected to the player's bet increases.
3. The goal is to squander before the aircraft flies away (crashes).
4. If a player cashes out in time, they win their stake multiplied by the present coefficient. If the aircraft flies away before they cash out, the bet is lost.

The game's ke.bitz.io visual is purposefully minimalist, similar to early computer system graphics, which guarantees it runs efficiently on both home computer and mobile devices without lagging.
