Gamers put bets on numbers (1, 2, 5, or 10) or on one of the 4 bonus offer games (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). If the wheel stops on the section a gamer has bet on, they win a payout or gain entry into an interactive benefit round.

If the main wheel arrive at the exact matching section, the payout for that number or the multiplier for that bonus round is enhanced appropriately. This is where enormous payouts can start to form before gamers even reach a reward round.

The Four Extravagant Bonus Rounds

The true heart and soul of Crazy Time are its four perk rounds. These mini-games transport players away from the primary wheel and into immersive, computer-generated perk environments.

1. Coin Flip

The simplest of the four reward rounds, Coin Flip offers a quick and simple mechanic.

- **How it works:** A coin with a red side and a blue side is put in a mechanical flipper. Each side is assigned a random multiplier before the flip.
- **The Outcome:** Whichever color faces up when the coin lands identifies the multiplier used to the gamer's stake.

2. Cash Hunt

3. Pachinko

Influenced by the conventional Japanese arcade video game, the Pachinko bonus offer round is all about gravity and suspense.

- **How it works:** The presenter reaches a platform and drops a puck down a large board filled with physical pegs. At the bottom of the board are numerous multiplier worths, alongside a "DOUBLE" zone.
- **The Outcome:** The puck bounces down the board and lands in among the multiplier slots. If it arrive on "DOUBLE," all multipliers at the bottom of the board double in value, and the speaker drops the puck a second time. This can repeat up until the maximum multiplier limit is reached.

4. Crazy Time

The holy grail of the video game, Crazy Time takes players behind a massive red door into a surreal, Alice-in-Wonderland-style virtual world.

- **How it works:** Players are faced with an enormous virtual wheel including 64 segments filled with big multipliers and "DOUBLE" or "TRIPLE" wedges. Before the wheel spins, gamers should choose one of 3

flippers (Green, Blue, or Yellow).

- **The Outcome:** The speaker presses a big red button to spin the wheel. Whichever sector aligns with the gamer's selected flipper determines their prize. If the wheel lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins once again. This process can repeat, potentially causing the game's optimum promoted payout of 20,000 x the bet.

Methods and Approach

While Crazy Time is basically a game of opportunity governed by random number generators (RNG) and physical physics, players often utilize various tactical methods to manage their bankroll and maximize their home entertainment time.

- **The Low-Volatility Approach (The Safety Net):**
    - Focusing heavily on numbers 1 and 2, that make up a considerable part of the wheel. This method yields frequent, smaller wins that help sustain the gamer's balance for a longer period.
- **The Bonus Hunter Approach:**
    - Wagering specifically or mainly on the 4 bonus rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). Since these sections appear less frequently on the wheel (just 9 segments overall), this approach involves longer dry spells in exchange for access to the game's primary function tourist attractions.
- **The Balanced Approach:**
    - Spreading small bets throughout both numbers and reward rounds to ensure eligibility for the benefit mini-games while keeping a cushion from routine number hits.
