What is CS: GO Roulette?

Rather of betting with fiat currency like United States Dollars or Euros, players wager utilizing their CS: GO weapon skins, or site-specific virtual credits obtained by transferring skins.

The core property remains identical to the traditional gambling establishment game: gamers position bets on various results (such as colors, numbers, or particular varieties) and wait for the wheel to spin. If the ball lands on their picked section, they win skins or credits proportional to the odds of that result.

2. **Black (Numbers 8-- 14):** Usually pays 2x the original bet.
